Operator Reviews

"Mike and the Laser Blast team were crucial in the design phase as we integrated lots of technology including lights, fog, DMX, and interactive video. The Laser Blast team also supplied 31 phasers and all controls. We could not be happier with the quality of equipment, industry expertise, ease of communication throughout the process, and flawless install. Top notch people and top notch product!"

Chris & Rich, Rebounderz

".. We used their flexible upgrade offer to refresh and add the wireless charging racks. Not only do they look great; we're spending less time on startup and shutdown every day. We've been tickled with the equipment and the service we get from Laserblast." *Charlie, Lazer Rush*

"..The laser tag paid for itself within a year. We especially like how easy it is to upgrade the gear. We added team bases to expand our game formats, and later on added some scoreboards inside the arena without breaking our budget." *Ryan, Zao Island*

".. We installed our Laserblast system in April 2012, replacing an older competitor system. The quality of the Laserblast gear and ease of use, along with game features made the decision an easy one for us..." *Bill, Interskate 91 North*

DID YOU KNOW?

Laserblast laser tag equipment is operating in 30 countries, and we have installed over 500 systems.

Our Story

**ENGINEERING LASER TAG
EQUIPMENT SINCE 1997**

Our founders made use of decades of real-world engineering experience to design a sophisticated laser tag system that could withstand the energy of excited kids bouncing off the walls! Take a look inside our phaser to see the difference a well-engineered design makes.

*Carla & Tim Ewald, Zap Zone
Farmington Hills, MI 1997*

Having developed optical glass for fighter jets, electronics for space shuttles, and industrial measurement lasers, we understand the importance of reliable equipment that stands up to the test of time. Many of our customers continue to profit from our laser tag systems after 15-20 years of operation.

What makes us Different?

Innovative Technologies: clip-free suit-up, wireless charging, capacitive touch detection, rubber grips, and 1000+ cycle rated, safe, LiFeP batteries.

Laserblast is a growing, dynamic laser tag equipment industry leader that will add excitement to your family friendly attraction. We also give you the confidence of a smart investment with growing revenue. Let us demonstrate to you why our products are the best in the market, have the most advanced features, and give you the most repeat play possible.

Renowned Durability to ensure your investment in our systems hold up for years to come.

Over our 22 years of laser tag, our project coordinators have gained effective knowledge about opening and operating a successful laser tag attraction. Our project coordinators will give you the individual attention needed to make your attraction a success.

The People: From project coordinators to our customer support team we are committed to providing the best experience possible.

THE MOST DURABLE LASER TAG SYSTEM ON THE MARKET:

CYBERBlast

The Best Tagging Technology

Cyberblast provides the highest quality laser tag game play. It starts with our unique-in-the-industry computer aided alignment process, ensuring that every single laser is evenly matched and accurate. We then angle **16 hit sensors** to prevent tagging dead zones and make full use of multi-level arenas.

Immersive Environments

Using our flexible arena devices and built in DMX controls, Cyberblast brings the arena to life. Our software can trigger sounds, lighting, and even physical effects like fog and air jets. These effects can be triggered by touch sensors, tagging, detectors, or nearly any other action in the game.

Some of our previous immersive projects include a haunted mine in the midst of a cave-in, an ancient adventure with venomous snakes, and a war-torn city with giant animated vehicles playing against each team.

Game Variety    

Every Cyberblast system includes over 25 game formats, and free access to new formats as we create them every year! Some games are intended for smaller groups to make the arena fun even if only 5 people want to play on a weekday afternoon, some are fun for big groups of new players, and some are tailored for advanced players on special VIP nights.

Operator Resources

We provide all the marketing and operational support you'll need for your laser tag center. This includes hundreds of model photos, software, maintenance walk-through, and marketing templates.

Features

- Targets** - Award bonus points and activate effects.
- Cybergates** - Restrict access and award powerups.
- Base Stations** - Central defense points.
- Elements** - Multi-purpose: Mine, Recharge station or Detector.
- Trivia Stations** - Customizable in-game quizzes.
- AI Targets**- 10' interactive opponents to bring your arena to life.

Cyberblast is designed with ease of operation in mind. Your center is very busy at peak times. It is absolutely critical that your staff can focus on keeping customers happy instead of stumbling through complicated startup procedures. User friendly game software makes it easy for your staff to pick a new game or accommodate guests needs.

Maintenance is a breeze. Simple part swapping with color coded connectors and quick-close cases. Our emergency support team is available to help you 24/7.

- 16 Hit Sensors
- 1000+ Cycle LiFePO4 Battery Packs
- Shoulder-Mounted 4-Voice Stereo Speakers
- Comfortable Futuristic Design

**BEST MOBILE SYSTEM
IN THE LASER TAG
INDUSTRY**

FUTURISTIC

The most striking feature of the CyberBlast Phaser system is its futuristic style that stands apart from every other laser tag system. Not only does the rubber cover look great, it also handles better than older plastic-only shells.

Phaser Only System

We offer Mix N Match Packages

CyberBlast Phaser is our lightest weight laser tag system at only two pounds per phaser. A ten player system can be contained in a single carrying case complete with a touchscreen laptop computer. The system is most often used for portable laser tag events and temporary installations.

Durability & Longevity

CyberBlast uses field-proven LaserBlast optics, triggers, and shock isolation. Nine mounting bosses and strengthening ribs ensure a long-lasting phaser case. The rubber cover absorbs impact, providing another layer of protection for the electronics inside.

The latest advance in battery technology is used in the CyberBlast Phaser system. A LiFePO4 battery provides a more stable chemistry than ordinary Lithium Ion, while delivering 16 hours+ of life on a single charge and 2000 charge/discharge cycles (over 6 years at 300 cycles per year) before wearing out. Other chemistries like ordinary Li-Ion wear out after 600-1000 cycles (2-3 years).

Features

Lightest Weight System
Party Rentals & Temporary Attractions
Lowest Cost System

Music Control
Targets
Basic Game Parameters
One-Year Standard Warranty

Mobile Party Rental

Mini Laser Tag Addition

Target Gallery & Special Applications

24 Capacity Phaser Rack

The 2-watt multi-voice speaker allows multiple sound effects to be played at once, so you don't miss out on critical updates throughout the game. A pico-vibrator is mounted in the grip of the phaser, providing tactile feedback when the trigger is pulled and when you are tagged. The RGB LCD shows your rank, score, shots remaining, and other information throughout the game. Angled at 45 degrees, the screen can be read quickly so you can get back in the action. Extra thick rubber bumpers surround the LCD preventing damage to the most sensitive part in the phaser.

The CyberBlast Phaser system is typically used for portable applications, however it can also be used as a low-cost fixed attraction to reach a younger target audience. If you would like to use Cyberblast Phaser in a fixed attraction, several options are available to improve the game experience.

The LED-lit display rack holds up to 24 phasers, and their chargers in an attractive case constructed of thick ABS plastic and wood. A single leg of the case can be purchased instead, holding up to 12 phasers in a very small footprint.

Aurora Laser

The laser tag industries largest beam! Our highly visible laser technology can be seen completely from the tagger and those being tagged. The beams halo effect easily cuts through fog. Our Star Wars inspired beam is cone shaped with a smaller shape within. This brings much more excitement than your standard small red dot laser tag beam.

Trivia Tag

Boost your laser tag group event bookings! Using our Cyberweb cloud platform, events from birthday parties up to corporate facility rentals can create their own questions, powerups, and penalties. 21 unique rewards can be selected, including: bonus points, spy mode, mirror shields, and cloaking. Our Trivia Game tracks each player individually, and escalates the rewards and penalties as each player progresses through the game. Best of all, your customer can easily create the questions at our entry portal; <http://playcyberblast.com/triviatag>

Custom questions are especially important for corporate events and school groups. School groups can practice what they've been learning in class in a fun environment. Company event bookers can better justify a team building event by reinforcing the company message in-game.

AI Targets

Bring your laser tag arena to life with AI Projector Targets! Now players can take on giant animated opponents that appear around the arena. Once animated opponents have made their entrance, players will only have a few seconds to tag them before they attack and shut you down. Custom videos are available to match your arenas style perfectly.

Are you ready for a change of pace for your frequent players? Switch the AI Targets into Power-Up Mode. Similar to home-based video games, animated power-ups appear on the projector screen throughout the game. The first player to grab the powerup when it appears gets a temporary powerup like Spy Mode, Cloaking, or Weapon Upgrades. Power-Up Mode is another great way to give your frequent players a new experience every time!

Each AI Target Includes: CyberPi Media Player, LED Projector, Mounting Hardware, Target, Emitter, & Local Speaker

(8' x 6' Projection Size)

FREQUENT PLAYERS PROGRAM

Replace Printed Scorecards,
Stay Connected, & Save Money

Earn achievements and hack the game with Powerups. Powerups reward players starting with the first game! Earn achievements through a combinations of dominating performance and playing all of the unique game modes. Unlock and equip new powerups from Spy Mode to the Elemental Attack!

Players earn achievements by playing frequently. Achievements range from very easy, "Mercy" (don't finish in last place) to very difficult "T-1000" (Eliminate 100 players in a elimination game format). As players complete these achievements, they earn points that unlock new powerups. The achievements are designed for a steady progression, so players are always moving towards the next reward. With their smartphone, home computer or in-store web terminal, they can change their powerup for the next game and track their progress.

DMX Effects

Our software can trigger sounds, lighting, and even physical effects like fog & air jets. These effects can be triggered by touch sensors, tagging, detectors, or nearly any other action in the game. Some of our previous immersive projects include a haunted mine in the midst of a cave-in, and an ancient adventure with venomous snakes that fire back at nearby players! Some of our interactivity kits include: H2O/Fire Effect, LED-Lit Fog Jets, Base Enhancement Lighting, and central arena bars to glow the winning team's color, and flash with game announcements. Check out our videos online to see how we bring laser tag to life!

TARGETS

Award bonus points
and activate effects.

"Great laser tag equipment and great service! I have been a laser tag operator for 23 years and I am very pleased with our decision to switch to LaserBlast. We bought our 1st system in 2007 (42 vests) and purchased a 2nd system in 2016 of 50 vests. Since then we have added 2 of the new "phaser-only" hand held units. These are great for smaller guests and those who might have special needs. I have worked with other laser tag equipment where service, parts, support, etc are hard to get. With LaserBlast, you will get prompt, helpful service, quick turnaround times (if ever needed), and quality products. Although they have hundreds if not thousands of customers, they will always make you feel like you are their top priority."

-Tim Kintz, Lazer X Fort Wayne, 23-Year Operator
