

HOW TO **CLEAN** YOUR LASER TAG EQUIPMENT

The key to cleaning laser tag equipment:

3M QUAT DISENFECTANT CLEANER CONCENTRATE

[Where to buy?](#)

1

Follow the directions on the bottle for how much water to add to dilute it properly.

2

The disinfectant should be sprayed onto a cleaning cloth or wipe.

3

Then use the cleaning cloth or wipe to brush across the equipment.

Avoid spraying directly onto the equipment, to avoid liquid pooling on the circuit boards.
